

**25 Reasons Why I Think the Oil God Has Saved for Israel
Will be Discovered by Hayseed Stephens and NESS Energy
With Excerpts from Hayseed Stephen's Film Oil the Road to Armageddon
Written by Timothy C. Davis, Apr 98 - Mar 99**

1. In 1982 while on a business trip to Israel, Hayseed Stephens claims he had a God-given revelation that the richest oil field in the world is at the southwest end of the Dead Sea. At that time, the area surrounding the Dead Sea from its northern tip around to the southern edge on the western side was still controlled by Israel. Much of this land was acquired because of the favorable outcome of the six day, June 5th - 10th, 1967 Arab-Israeli War. When asked by the Israelis in 1983 where in their country he would like to drill for oil, Mr. Stephens took a detailed map of the region and pointed to a precise location. Since that time until now, the land on the western side of the Dead Sea has piece by piece been reacquired by Palestine, all that is except for the area surrounding the drilling site he proposed in 1983 at the southwest end of the Dead Sea.

2. Since the days of Sodom and Gomorrah, the area where the Dead Sea is now, was once called the valley of Siddim. Throughout that region there were numerous oil pockets or wells that were at ground level, which is a proven fact both historically and biblically. This commodity was brought to trading centers, such as Jericho, where it was bartered for other goods. In fact, prior to the time period when Sodom and Gomorrah were destroyed, the Bible talks about how during conflicts many men fell into these wells or pits and literally drowned in oil. **GENESIS 14:10** states; "Now the Valley of Siddim was full of bitumen pits (tar or oil wells on the surface) and as the Kings of Sodom and Gomorrah fled, many fell into these pits/wells, while the rest escaped to the mountains."

3. What was it that could have caused an explosion so great that it would have blown billions of tons of rock and dirt, (oil saturated strata) skyward leaving a hole 8 mi. wide, 40 mi. long and 18,000 ft. deep? A likely answer was the ignition of a huge quantity of underground methane gas and oil. This explosion formed the Dead Sea, which up until this time was near where Sodom, Gomorrah and the Valley of Siddim were located (geologically proven in 1992). **GENESIS 19:24, 25: 28-29** states; "The Lord rained (exploded) on Sodom and Gomorrah brimstone and fire (sulfur and flaming rock filled with oil) from the Lord out of the heavens...He overthrew, destroyed, and ended these cities...and he (Abraham) looked toward Sodom and Gomorrah, and toward ALL the land of the VALLEY (Siddim), and saw and beheld the smoke of the COUNTRY went up like the smoke of a FURNACE." Next to Sodom and Gomorrah located at the southwestern and southern end of the Dead Sea!!!

4. Israel is God's chosen nation and He has promised them (Israel) their just inheritance which as of yet they have only partially received. In fact **EZEKIEL 16:53** says; "I will restore them again from their captivity, restore the fortunes of Sodom and her daughters, and I will restore your own fortunes in the midst of them." What do you suppose the fortunes of Sodom were? It certainly wasn't sand, rock, or tumbleweed, it was oil!!!

5. During the early 1980's an electrical engineer from Des Moines, Iowa, (Mr. Stephens had never met before) paid him a visit and stated that he also had a God-given revelation about where Israel's oil is. He said he was sent to confirm to Mr. Stephens where the oil is because Israel would need it in the future. Hayseed (skeptical to say the least) was then informed by this man that it was at the southwest end of the Dead Sea. (**Genesis 13:10/14:10**)

6. The rock that is mined from the Dead Sea is saturated with oil and could profitably be mined as shale oil. In addition, due to the runoff from the high cliffs located on the southwestern banks of the Dead Sea there are huge ravines that have been carved out by water as it descends off these slopes. Inside some of these ravines oil seeps (oil oozing from the ground) have been exposed (the greatest indicator of an oil field waiting to be discovered). Where are these seeps? Within very close proximity to Hayseed's originally sought-after drilling site at the southwest end of the Dead Sea.

7. Both to the far north and south along the tectonic plate, which runs along the eastern edge of the Dead Sea, there are numerous oil fields where proven oil reserves exist. This tectonic plate is the largest in the world and from Jordan on the eastern side of the Dead Sea going west off this tectonic plate rift, there is a 30,000-ft. displacement. This is where Mr. Stephens and Israeli geologists believe the oil has been coming up through the mantle of the earth for thousands of years. Hayseed believes it has been turned away from Israel due to the salt cap that is sitting on top of it and sealing it until God is ready to let it flow.

8. The scriptures point out that a Gentile will discover the oil in Israel, not a Jew (**Isaiah 60:5**). Who more likely to discover Israel's oil than a full-time Christian Preacher who just happens to be head of his own oil company and is now going to be drilling for the oil God has been saving for Israel. The Israelis are fully aware of the fact that there is a large quantity of oil in their country and that a Gentile will discover it for them as King Cyrus of Persia (a Gentile) was promised approximately 2,500 years ago. They have concluded that Hayseed Stephens is that man because they have given him the long-term lease to drill for their oil at the southwest end of the Dead Sea.

9. In 1986 and in 1994 pictures were taken of Hayseed standing over the site he is going to drill at. In the first picture, the huge rock cliffs behind him show an image resembling God sitting on a throne. In the second picture, taken eight years later, the same rock cliffs show an image of Jesus Christ hanging on the cross. Copies of these two pictures are planned to be printed for the front and back covers of NESS Energy's Prospectus.

10. NESS means "Miracle" in Hebrew, and Israel is past due for a miracle. Elohim Perazim # 1 is the name of the first well that will be drilled by NESS Energy, this name in Hebrew means "Lord of the Breakthrough."

11. According to **GENESIS 49:1**, "And Jacob (Israel) called for his sons and said, gather yourselves together (around me) so that I may tell you what shall befall you in the latter or last days." **GENESIS 49:25** says "By the God of your Father who will help you, and by the Almighty who will bless you...blessings lying deep beneath the deepest deep." The Bible says the riches of Israel will be found at a very deep location in the earth. It just so happens the lowest point on earth is at the Dead Sea (approximately 1,300 ft below sea level) and the planned drilling will take place down to a depth of 21,000+ ft. below that, or approximately 4.5 miles below sea level. A very deep oil well indeed! The deepest ever in Israel and possibly the Middle East!

12. Men with the unusual knowledge and skill of drilling 20,000+ ft. wells have been guided from the oil fields of Oklahoma and Texas areas, and have now become part of Mr. Stephens' team.

13. The Bible also points out in **ISAIAH 60:5** that the oil will finally be turned to Israel. If it is turned it must currently be directed to some other location. Middle East? If so, like drinking water through a straw out of a cup, the liquid is extracted from the bottom while the level of the liquid decreases from the top. The lower elevation of the Dead Sea, combined with the depths this well will be drilled to, could cause well head pressures all throughout that region to diminish making the Israeli oil wells the most prolific in the history of this world. Try to imagine how a water drainage sump works in the basement of a house. Drainage tile directs water from all around the perimeter of the house into a cylindrical basin, which is located underneath the basement floor. Despite it being dry at higher elevations around the house, the sump basin is at a planned lower level where any appreciable water will ultimately collect at exactly the place where the designer wants the water to go. God has planned for this collection point of Middle Eastern oil to be directly under land that has been owned by Israel since its present inception in 1948, initially over 4,000 years ago. I can see God's handiwork, can you???

14. One of the greatest preservatives and natural containers known to man is salt. It has been proven in the past to be a trap for oil in many places throughout the world. Current satellite imagery has shown a huge oval shaped salt deposit over nine miles long, _ miles wide and estimated at 18,000 ft deep at the southwest end of the Dead Sea. Protruding 600 ft. out of the surface when Sodom and Gomorrah were destroyed, the heat burned off the salt and sulfur sealing the oil that has always been meant for Israel (**Gen. 19:28**).

15. Many of the prophecies relating to Israel upon their final return to their land have already occurred. At Israel's inception in 1948, this land was of two distinct types. It was either swamp or barren desert, but since 1948 through their ingenuity, hard work, and the fact that they planted over 200 million trees, they have changed the climate of the entire region and turned their country into the most agriculturally efficient nation on earth. According to the World Health Organization, over 90% of the citrus such as bananas, mangos, oranges, grapes and other fruits supplied to 500 million Europeans come from little tiny Israel (approximately 8,000 square miles). As **ISAIAH 27:6** foretold; "He shall cause them that come of Jacob to take root..Israel shall blossom and bud and fill the face of the world with fruit." This is one of a long list of prophecies that have already been fulfilled since Israel was reestablished as a nation. Can the discovery of the "treasures of darkness" be far behind???

16. The Occidental Oil Company spent over 60 million dollars and drilled numerous oil wells in the Israel region and in the Mediterranean Sea Their efforts were fruitless, because they were not drilling in close proximity to the southwest end of the Dead Sea. It wasn't God's time yet, and since God does not lie and Israel is relatively small, we know where the oil is not, improving the chances that the oil is indeed where Mr. Stephens claims it is.

17. Who is it that is going to fix all the Y2K date sensitive chips in all the world's offshore drilling platforms and those in worldwide pumps and petroleum refineries, especially in the Persian Gulf? Most of the world's programmers and computer technicians are from the United States and are too busy fixing our problems to worry about other nations computer fixes. In addition, barges and port operations facilities are heavily reliant on computer technology. It is highly likely that these systems will not in many cases be Y2K compliant. If they are not fixed, the lost output and reduced ability to transport oil could throw the overall supply demand relationship dramatically out of balance. This demand could force much higher prices enabling a small company like NESS to grow rapidly since their technology will be brand new, and therefore Y2K compliant. Ness could ride the wave of earnings to extreme profitability as demand and prices surge.

18. This is the 50th Anniversary time period of Israel becoming a nation. According to scripture, God will bestow upon Israel great prosperity around this "Jubilee Year". What better time to discover oil in Israel!!! The discovery will

probably happen specifically on a Jewish feast day or holiday. Considering the tentative start date of September 25th 1999, (Jewish Feast of Tabernacles) and the 250 days Hayseed estimates it will take to drill down to around 21,000 ft. this will bring Hayseed's drill bit very close to the "treasures of darkness" around the Feast of Pentecost. When God is ready for Hayseed to bring in this oil well, I am certain he will find it on the very first try.

19. Approximately ten months ago, I became fascinated with the amazing code discoveries found hidden in both the original Hebrew of the Old Testament and the Greek of the New Testament. The codes we are talking about are called Equal Distant Letter Sequence (ELS) codes that I am convinced were supernaturally engineered by God into the Bible. These codes consist of letters spaced equally throughout both Testaments of the Bible at varying locations, which spell out words, and word groups that the original authors couldn't possibly have consciously planned. With the advent of high speed PC's, massive amounts of data can be scanned for any logical patterns in a matter of seconds.

20. With the high level of nuclear / biological / chemical weapons worldwide, it seems highly likely that one or more of the main oil exporting regions of the world could be taken out of production in the future, and thereby cause a huge supply/demand imbalance. The world's demand for oil is ever growing and despite a current glut in oil supplies, the overall steadily increasing demand would quickly use up any excess if this supply is even slightly diminished due to some sort of man-made or natural calamity, placing the world's and Israel's oil supply in jeopardy.

21. Everything is falling into place for Hayseed and his team. An amazing development just occurred regarding the oil rig he found and is now trying to acquire in Austria. It was discovered that a Jewish geologist, who at various times in his career worked for British Petroleum, and Phillips Petroleum, said the great field in Israel would only be found when the time came that a giant rig could be built to go to the deep. In the 1930's he was tasked with determining where the next giant or super giant oil field would be found in the Middle East region. His analysis led him to the same conclusion as was revealed to Mr. Stephens, that Israel's oil was at the southwest end of the Dead Sea. The equipment dealer selling the rig just happens to be this man's Grandson, and about fell out of his chair when Hayseed told him it was going to be used at the same location his Grandfather was planning on using it many years earlier. Another interesting feature about this particular rig is that it is called an EMSCO 3000 and there are only a dozen or so rigs in the world capable of drilling as deep as this one can. In fact, according to a conversation I had with Hayseed, there has never been a rig in Israel capable of drilling to the depths needed to discover this oil field. With God's help, soon there will be!!!

22. **ISAIAH 45:3** states; "I will give you the treasures of darkness, riches stored in secret places so that you will know that I am thy Lord the God who called you by name." This verse in the original HEBREW then translated states; "I will shoot (gush up) to you (oil) deposits that are stored in valuable dungeon-type containers (oil traps), so that you will know that I am thy Lord the God who called you by name." Hayseed plans on letting this well gush up and run for 48 hours straight before capping it. He'll do this so every major media organization around the globe can televise it proving to the entire secular world that when God makes a promise you can count on him keeping it. The God of Abraham, Isaac, and Jacob, is the God who keeps the covenant for a thousand generations with His people, no other god does this.

23. The Book of Revelation says that the nation to their north (Russia) will attack them. Of what benefit would they gain by attacking little tiny Israel? Is Oil the reason? Oil that has been sitting under Israel for thousands of years since God created this Earth. This truly prolific oil field will be the hook in the jaw of every major power in the world, especially since it belongs to the outcasts known as Israel. In the future, Russia will attack and be destroyed and then another mighty group of nations will advance upon Israel from the east with a 200 million-man army according to the Bible. Did you know that there is only one nation in the world that can come even remotely close to fielding a 200 million-man army and that nation is China, and as the Bible states they are due east of Israel. Currently, China is building a superhighway through Tibet, Pakistan, and Afghanistan that has little commercial value and is headed directly to Israel. Did you also know that most scoffers said that China would never be able to cross the Euphrates River Valley to get to Israel because of the sheer enormity of that river? Well the scoffers are wrong!!! In 1994 Turkey completed the Ataturk Dam which as **REVELATION 16:12** says, will allow the Kings of the East to cross the Euphrates River Valley so that they can proceed to the Valley of Mageddo. In 1981, another Christian oil wildcatter, named Andy SoRelle, drilled a well in Israel near Haifa which borders the Mediterranean Sea. He found oil there in what appeared to be a large quantity at 21,000 ft., but due to his drill bit breaking off and him not being able to retrieve the drill pipe, along with the associated expense of retrieving it, he abandoned the whole operation. I firmly believe it just wasn't God's time for that field to be discovered. I wouldn't be surprised if when Hayseed finds the field at the southwest end of the Dead Sea, God blows the bit and the tubing out of this predrilled well at Haifa and two large oil fields are put into production simultaneously in Israel. Coincidentally, did you know Haifa's location just happens to be on the western edge of the Valley of Mageddo.

24. God is Great and God does not break promises **ISAIAH 60:5** states, "Then you shall see and be radiant, your hearts shall thrill at the glorious deliverance; because the abundant wealth of the Dead Sea shall be TURNED to you (Israel) unto you shall the Nations (Gentiles) come with their Treasures." \$\$\$

25. So why am I convinced that Hayseed Stephens and NESS Energy will find the oil that God has been saving for Israel? I don't believe that God will allow just anyone to find this oil field!!! I absolutely know that it won't be a secular, multinational oil company so that they can line their pockets with the profits that were meant for Israel and for those that have faith in God's unchanging word. If you disregard everything I have said, please consider this one final point. Hayseed told me that on his Israel trip in 1982 he visited the Holocaust Museum and the Boulevard of Righteous Gentiles where men like Oscar Schindler and others who helped the Jews throughout their history are honored. Many of the atrocities that took place against them throughout the centuries, and especially during WWII, are remembered. Some of these were captured on film and are now displayed for the entire world to see. After spending hours in that place and seeing what hell on earth was all about, Mr. Stephens came out a changed man and made a vow to God to give every dime that he earns, when he discovers this oil field, back to Israel. God loves the underdogs, those who have faith and persevere, but especially those who have a pure heart. Certainly many men have tried to find this oil field in locations fairly close to where Hayseed will drill, but none have stuck with it through the many years of heartbreaks and disappointments with the bulldog determination, persistence, and faith in God that this man has. He has spent nearly 20 years of his life, including 60 trips to Israel, in the relentless pursuit of a dream that is about to come true. Even considering everything I've said, no one, including Hayseed, will discover this oil unless and until it is God's time. God in his infinite wisdom has known all along when Hayseed's drill bit will finally tap into the Earth's last greatest oil field. Based upon the incredible number of seeming coincidences and supernatural ways in which the logistics for this operation are all coming together, I believe God's time is at hand. The Book of Esther describes the miraculous way in which God's control over the affairs of men can be seen in how he changed what appeared to be certain doom for the Jews into an unbelievable saving chain of events that is still legendary to the Jewish people of today. Like that story, God's fingerprints can be seen all over this project, the Master Architect is looking over Hayseed Stephens' shoulders giving direction so that His Heavenly timetable is kept.

26. BONUS: I wonder what the mathematical probability is that a Christian Preacher would: 1) Be the president of his own oil company; 2) Be acquiring the same oil rig that a Jewish company owns, and to be using it at the same location the geologist was going to drill; 3) Have the long term lease for the exact spot at the lowest point on Earth that for the past 20 years he has said the oil is located; 4) Have almost 20 years ago selected the only spot on the western side of the Dead Sea that is still owned and controlled by Israel today; 5) Be drilling for oil at a location where historically and Biblically large quantities of oil were known to have been; 6) Be drilling at the same location where the Bible promises that the economic lifeblood that once existed in this area will be restored in full; 7) Have a very rare crew that is skilled at drilling to the depths needed to discover this field; 8) Have oil seeping out of the ground at the location he is going to drill at; 9) Have identified Biblical verses promising that oil will be discovered all while associated and nearby verses have already been fulfilled; 10) Have Equal Distance Letter Sequence Codes in the Bible say his company will discover oil for Israel; 11) Have two pictures taken over his drilling site eight years apart that show images of God the Father on one and Jesus in the other on the cliffs in the background; 12) Be drilling for oil at a time in World history, that due to Y2K, Israel's and the World's ability to get oil could be seriously degraded; 13) Be drilling for oil in Israel very near their Jubilee Year and on the year that Christians have designated as the Year of God, the Father; 14) Be President of this company whose name means "Miracle" in Hebrew; 15) Be one of the extremely rare men on Earth that would give all his profits when he discovers this oil field back to Israel???

SO WHY DID I WRITE THIS? At approximately 3:45 am, on a December morning in 1997, I heard Hayseed's radio broadcast while I was driving to work. That morning I woke up at 2:45 am from a dead sleep, and for no good reason, had this overwhelming urge to get out of bed and start my day. That has never happened to me before that day or since. A coincidence? Maybe, maybe not. I am certain however, that this oil discovery will take place, so this is for all the scoffers and complete Bible ignoramuses who won't have a clue of the staggering worldwide strategic, geopolitical, and economic implications of this event when it happens! Most importantly however, is to be a witness to the fact that God is in control, that this oil discovery was no fluke, and that it certainly did not happen by chance!!!

**I (GOD) WILL BLESS THOSE WHO BLESS YOU (ISRAEL),
AND I WILL CURSE THOSE WHO CURSE YOU. ALL THE NATIONS ON EARTH SHALL FIND BLESSING
IN YOU. Genesis 12:3**

If your not familiar with Ness Energy and Hayseed Stephens be sure to get our video, "Oil - The Road to Armageddon", just \$29.

If you would like information on becoming a prayer partner with Hayseed please call (817) 341-1477.
